

**Scientific Name:** *Cornus mas*

**Common Name:** Corneliancherry Dogwood

**Environmental Conditions:**

**Hardiness Zone:** 5a (4)

**Soil Moisture:**

VERY WET			VERY DRY								
occasionally saturated or very wet soil			consistently moist, well drained soil			occasional periods of dry soil			prolonged periods of dry soil		
	2	3	4	5	6	7	8	9	10	11	12

**Sun/Shade:** prefers full sun, tolerates partial shade

**Salt:** some observed tolerance

**pH:**  $\leq 8.2$

**Insect/Disease Factors:** relatively pest free

**Growth Characteristics:**

**Height:** 20'

**Width:** 20'

**Form/Habit:** round to oval, often multi-stemmed, low branching tendency creates very short trunk, single leader typically absent although available, must specify single-stem form if desirable

**Rate:** slow to medium

**Ornamental Characteristics:**

**Flower:** very showy, small, yellow, early spring before leaves emerge

**Fruit:** bright red, resembling elongated cherries, edible

**Seasonal Foliage Color:** dark green in summer, often glossy, occasional purplish-red fall color

**Bark:** attractive, brown and gray, scaly/flaky exfoliation

**Transplant Issues:** easy to transplant B&B and  $\leq 2$ " caliper bare root

**Management Issues:** low branch attachments may require pruning for street tree use

**Suggested Uses:** wide street tree lawns/pits, narrow street tree lawns/pits with pruning or single-leader form, parks, suitable for CU-Structural Soil™

**Cultivars:** 'Golden Glory' (more narrow and upright form, abundant flowering, red-purple fall color, leaves and fruit larger than species)
