

Scientific Name: *Acer miyabei*
Common Name: Miyabei Maple
Environmental Conditions:
Hardiness Zone: 5a (4b)
Soil Moisture:

Sun/Shade: prefers full sun, tolerates partial shade
Salt: unknown
pH: ≤ 8.2
Other: State Street™ has reportedly good heat tolerance
Insect/Disease Factors: relatively pest free
Growth Characteristics:
Height: 35’-45’
Width: 30’
Form/Habit: upright oval to rounded, can have open or dense branching, low branching tendency often creates short trunk
Rate: medium
Ornamental Characteristics:
Flower: greenish-yellow, in pyramidal clusters, spring
Fruit: samara
Seasonal Foliage Color: flat to semi-glossy, medium to dark green in summer, yellow in fall, often holds green late so fall color is short-lived before leaves fall
Bark: dark gray, typically rough and corky
Transplant Issues: easy to transplant B&B or ≤ 2” caliper bare root
Management Issues: none of significance
Suggested Uses: narrow or wide street tree lawns/pits, parks, suitable for CU-Structural Soil™
Cultivars: State Street™ (‘Morton’, zone 4, upright oval form, good uniform branching, dark green foliage, good golden yellow fall color, possibly fast growing)
